Hi Kris

Can you give me a statement of work (SOW) as to what you would like Toeroek to do? Once I have what you need I will submit the paperwork.

Thanks,

Mike Sibley

Hi folks,

We can certainly fund this type of work. I'm very interested to see if the contractor can deliver what we need, and when we need it. For instance, can they provide this service in an ER situation.

The typical procedure for approving work on a contract is for the OSC (COR) to request funding approval. So, just let me know how much you need for this project. A request by email is sufficient. I can approve by email.

Thanks everyone.

Hello Kris:

Dean is correct, we now have a contract available with Toeroek out of R8. R7 is in the process of setting up the contract access for R10.

So, I will discuss with management (Wally Moon) and get his input as far as approving the PRP search. What is your timeline for needing the information? I have spoken with contractor Toeroek and it can take a couple weeks to complete the request depending on how involved it is.

ERRS DPO

Thanks,

Mike Sibley

Kris,

There is a R8 or R9 contract that R10 is buying into. It's also with Toeroek. That contract allows for PRP searches. You will have to get ECL management approval to spend contract dollars on this work.

Hi Mike-

In February I requested through a headquarters contract with Toeroek for a PRP search for the Odessa Biodiesel Site. As I learned, the Toeroek contract is not for PRP searches, but instead is for a search of their "corporate library" which is a collection of past PRP searches. I sent them the names of the following entities that we have reason to believe were owners and/or operators of the Odessa Biodiesel site: Evergreen Renewable LLC; Access and Global Investments LLC; TransMessis Renewable Energy Inc; and TransMessis Columbia Plateau LLC. The result of the search came up with nothing. This means Toeroek had no information from past searches on these four entities.

For our continued attempts at cost recovery (over \$630,000 in costs) we will need to have a full PRP search conducted. There may some other contracts available to us, but there may not be. I've cc-ed Dean so that he is aware of the need. Please let me know if you are aware of any ECL resources that could be used for a PRP search.

Thanks,
Kris
